

Outsourced Delivery Service

Secure Courier

The day to day running of a fleet of delivery vehicles and their unique issues can drain time and resources and have a critical impact on the continuity of your supply chain and business.

echo's Outsourced Delivery Service manages all the aspects of transporting your products or stock to your own locations or customers.

The service is designed for those customers who operate a number of outlets either locally or nationally where stock is ordered either the day before or on a weekly basis and is delivered by their own dedicated fleet either overnight or a set daily run. This includes retail outlets, garages and restaurants.

echo's Outsourced Delivery Service will manage your fleet of existing vehicles and drivers providing hassle free logistic services across the UK. Improvements in efficiency and cost effectiveness can also be achieved by utilising echo's existing trucking, warehousing and distribution network.

We can also develop bespoke delivery solutions to suit your specific requirements. For example allowing our delivery staff to have approved access to increase the delivery window and ensure the stock is in store. This will enable stock control and replenishment to be completed prior to opening.

Features

- Managed vehicle and driver fleet
- Dedicated vehicles
- Capability planning
